A-331 Block L – North Nazimabad, Karachi, Pakistan

SUMMARY

AI & Web Developer with System Administration experience, specializing in AI bots, workflow automation, and cloud-based infrastructure. Proven expertise in building intelligent systems, managing business-critical servers, and administering company-wide technical platforms. Strong background in LLM integrations, DevOps support, and secure system management. Strong background in PyTorch, TensorFlow, and modern language models with proven ability to deliver production-ready solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Python Frameworks: PyTorch, TensorFlow, LangChain, LlamaIndex

Machine Learning: Large Language Models, Natural Language Processing, AI Chatbots

Language Models: Llama 2, Llama 3, GPT-4, Gemini

Information Security & Compliance: Policy writing, ISO 27001, compliance support, Data protection.

Databases: SQL, Database Management

AI Technologies: RAG Framework, Conversational AI, LLM Integration

Development Tools: Git, GitHub, Python IDEs

EXPERIENCE

AI Engineer & Wordpress Developer

May 2025 – April 2026

NovaGroup, Dubai

- Developing and deploying **AI-powered bots** for internal automation and client solutions
- Designed and developed **intelligent automation workflows** using n8n, integrating multiple business systems to significantly reduce manual operations
- Built and deployed **AI-powered automation bots** by integrating APIs and LLM services for enhanced decision-making and process optimization
- Developed **Retrieval-Augmented Generation (RAG) chatbot systems** using LangChain and Python to enable accurate, document-based question answering
- Integrated large language models from OpenAI to create natural conversational experiences across chatbot applications
- Implemented **AI-driven screening and validation systems** using machine learning techniques for secure user interaction
- Collaborated with cross-functional teams to deliver **end-to-end AI solutions**, from architecture design to deployment
- Built a **security-focused AI chatbot system** capable of detecting suspicious inputs and enforcing access control mechanisms
- Engineered scalable backend systems for **task automation, notifications, and operational workflows**, improving internal efficiency
- Designed and deployed **client-facing websites using WordPress**, including full hosting setup, domain configuration, and performance optimization
- Managed **server environments and hosting infrastructure**, ensuring high availability, uptime, and security compliance

Permanent Faculty Member *June 2023 – Present*

Educad Academy, Karachi

- Serving as permanent faculty, delivering instructor-led courses across programming, web development, and data-focused disciplines
- Teaching Python Programming and Python with AI Training to students of varying skill levels
- Delivering Web Development and WordPress Development courses covering front-end, back-end, and CMS-based site building
- Conducting AI Training and Data Science courses, covering core concepts, tools, and applied techniques
- Teaching Data Analytics, Power BI, and Tableau courses for data visualization and business intelligence
- Delivering MS Office and MS Excel training for professional productivity and data handling
- Teaching a general Information Technology course covering foundational IT concepts and skills

AI Engineer *May 2024 – May 2025*

Rewisdom.AI, Karachi

- Built multiple conversational AI chatbots using Python and large language models including Llama 2, Llama 3, and GPT-4
- Developed RAG-based systems using Python with LangChain and LlamaIndex frameworks for intelligent document processing
- Created specialized chatbots for security, e-commerce, and customer service applications using Python
- Implemented AI solutions that handle user queries, order processing, and automated customer interactions
- Used Python frameworks like PyTorch and TensorFlow for model integration and deployment

PYTHON PROJECTS

Automation Bots & Business Workflow Systems | *n8n, APIs, AI Integrations* 2025

- Developed intelligent automation bots using n8n to connect multiple business tools and reduce manual workload
- Integrated AI services into automated workflows for smarter decision-making processes
- Built internal systems for task automation, notifications, and operational efficiency

Business & Client Websites | *WordPress, Hosting, Server Management* 2025

- Designed and deployed professional WordPress websites for business operations and clients
- Managed hosting environments, domain configurations, and website performance optimization
- Ensured website security, uptime, and regular maintenance

Conversational Chatbot | *Python, LangChain, LLMs* 2024

- Built intelligent chatbot using Python that answers user queries based on any content or document
- Implemented RAG framework using Python with LangChain for document processing and retrieval
- Used Python to integrate large language models for natural conversation flow

Security Guard Chatbot | *Python, AI Security, LLMs* 2024

- Developed security-focused AI system using Python that identifies and handles suspicious activities
- Implemented access control and restriction logic using Python programming
- Built intelligent screening system using Python and machine learning models

E-commerce Sports Chatbot | *Python, E-commerce Integration, LLMs* 2024

- Created sports shop chatbot using Python that guides customers and processes orders
- Built product recommendation system using Python and machine learning algorithms
- Implemented order booking and customer management features using Python
- Integrated with e-commerce database using Python and SQL for real-time product information

Verba Chatbot | *Python, Server Integration, Data Processing* 2024

- Developed customer service chatbot using Python that works with Verba server
- Built data processing pipeline using Python for training custom AI responses
- Implemented query resolution system using Python and trained language models

EDUCATION

Bachelor of Science in Mobile Communication and Security — Completed 2024
Sir Syed University of Engineering and Technology (SSUET), Karachi, Pakistan

Intermediate — Completed 2020
Government Degree College SRE Majeed, Karachi, Pakistan

Matriculation — Completed 2018
Stanmore Public School, Karachi, Pakistan

ADDITIONAL SKILLS

- Strong time management and punctual work behavior
- Experience with Python-based AI model integration and deployment
- Proficient in building end-to-end chatbot solutions using Python
- Knowledge of modern LLM architectures and Python implementation
